## Account-Based Tracking and Payment Application

- Generates usage reports on demand
- Removes need for dedicated print release PCs – no need to purchase another computer
- Permits multiple users to share departmental or group accounts

The NetPad Touch™ is a powerful new touch screen copy controller and payment terminal from Jamex that will revolutionize the way you track and account for copies. Through the combination of unique hardware and modern software applications, the NetPad simplifies administrative tasks as well as provides a familiar user experience.

Choose between two options with NetPad Touch: credit card processing or account-based tracking and payment. With NetPad's credit card processing application, users can swipe, copy, and go. Administrators who prefer to track copies and funds by user groups will find the account-based tracking and payment applications straightforward and easy to navigate.

Count on the NetPad Touch to modernize yet simplify your copy and print vending needs.

## We Make it Right. We Do it Now.

*Our company continues to develop great new products for payment solutions. We listen to our customers and give them more than they expect. Every one of us at Jamex is committed to providing **fast answers, products in stock, and superior tech support.***
