

82xx Copy Card Dispenser/Revalue Stations Remote Reporting

The Remote Reporting functionality of the 82xx series Copy Card Dispenser/Revalue Stations enables sending e-mails that provide cash accepted and meters reporting, as well as notifications of “events”. The report frequency is configurable and can be sent to multiple e-mails recipients. Additionally, “events” such as 'dispenser empty' or 'dispenser jammed' will generate a specified e-mail, to a defined set of recipients. The e-mail functionality for each device is configured through the administration screens of the 82xx series products.

Sample E-Mail Report

Remote Reporting Feature Summary:

- A. Periodic reports
 - I. User defined time for report to be sent
 - II. User defined frequency (Hourly, Daily, Weekly, # of Days, Monthly)
